Sprint 07-2024 Maintenance Release Notes

Part 1: All Features

Updates

Subject Jira/CaseWorthy ID	Description
Password Logic Update 859	The previous methods that were used to generate or email passwords to end users using stored procedures attached to forms has been deprecated. Account Managers and Analysts worked with customers who were identified as still using these methods to update with the intended method, which is to direct users to the Forgot Password feature for resetting a password.

Resolved Issues

Jira/CaseWorthy ID	Description
675/106135	One the *Program Assessment Mapping* form, to add clarity, the "Required Workflow Assessment" label and help text were updated. Previously, it was not clear that the **Required in Workflow** option was only applicable to workflows with Free Navigation. Typically, Assessments are always required in a workflow if they are mapped to the program and applicable to the Client.
1023/198136	Analytic Report format options were corrected. Previously, the currency option, among other options, were not applying/updating correctly.
1035/197896	Resolved a compliance issue on the *Project Summary* form. Previously, the new Special NOFO Project Types were not being considered with the rules giving access to the relevant "One Time Fields".
1126	The *Assessment Summary* form that displays after the Assessment step in a workflow now displays as intended. Previously, if a workflow displayed the *Assessment Summary* form after the Assessment, an error displayed.
